Powering the Evolution of the Personalized Hearing Experience.

Bright, crisp sound. Impeccable speech clarity. And a truly personalized sound experience. That's what you get with Radiant on the Extend Technology Platform. With more customization options than ever before, lithium-ion rechargeability, and the ability to hear sound directly from your iPhone® and compatible Android™ devices, Radiant lets you make the most of every moment.

EXTEND Platform

The Power of Clear, Natural Communication

Radiant — for the moments that matter*

The first Sonic hearing aid built on the **Extend Technology Platform**, Radiant offers a groundbreaking sound experience. You'll appreciate its high-performance sound systems that keep speech clear and reduce background noise, while virtually eliminating feedback. And, you can stream phone calls, music and other audio directly to Radiant from a variety of smartphones and tablets, or use its built-in telecoil for use in theaters and public places.

Personalize

Get a better fit, right from the start. Your hearing care professional can create a personalized hearing experience that works for you. Plus, with the SoundLink 2 app, you can have more control than ever before; adjust bass, mid-level and treble sounds using our streaming equalizer.

Recharge

Radiant hearing aids are equipped with built-in rechargeable **lithium-ion batteries**, which provide a full day's charge, even while streaming. Never fumble with another tiny battery again! Just set your hearing aids in the charger at the end of your day for a full recharge in three hours.

miniRITE T R in Charger

Radiant Hearing Aids. Powered by Innovation.

Noises can come from any direction, at any time, creating a distracting listening experience for hearing aid users. That's why the Radiant family of hearing aids has incorporated Sonic's advanced technologies that respond quickly to find, filter and fine-tune sounds arising from anywhere in your surroundings. Intelligent, integrated systems work together so you can hear more easily.

Find

Radiant's directional microphones pinpoint speech to keep conversations in focus.

Filter

Radiant's noise reduction technologies filter out background sounds so you can enjoy a more comfortable listening experience.

Fine-Tune

Radiant's amplification system enhances speech and minimizes ongoing distractions, making it easier for you to hear.

Highlight your Style

The rechargeable miniRITE T R is available in six elegant color options. Ask your hearing care professional to recommend the right technology level to meet your unique needs.

Shine with Wireless Accessories

SoundClip-A
